REDUCING THE RISK

People, especially children can be exposed to animal parasites when they accidentally put dirty hands into their mouth.

"It is estimated that 10,000 children in the US are infected annually with roundworms"

"Zoonoses" : an animal disease that can be transmitted to humans (*Webster Dictionary*)

Due to the severe repercussion of zoonoses we have made it our mission to increase public awareness to this potential danger.

We are now offering a LOW COST Fecal Test in addition to our LOW COST Vaccines.

Our Low Cost Fecal Test Is Only: \$12.12 (+\$6.86 C&M) ** A 27% discount to our Regular \$25.74 fee!

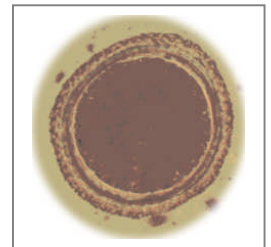

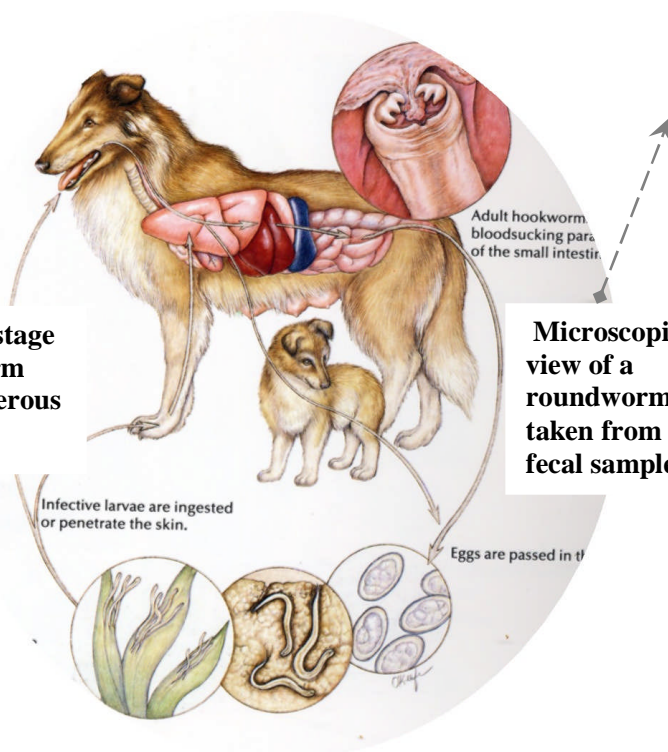

***The fecal tests are microscopically examined by our nationwide "Antech Labs" specialists**

For more information you can access the websites of the:

- **CDC** (central Disease Control and Prevention)
- **AAVP** (American Association of Veterinary Parasitologist)
- **CAPC** (Companion Animal Parasite Council)

The Larval stage of a tapeworm can be dangerous to humans
