

(Cat<8y) GRAND PET©DENTAL PLAN (Under 9 lb)

FELINES UNDER 8 YEARS OLD (50 years and older in humans) / DENTAL RELEASE (UNDER 9 LB)

Good dental hygiene is just as important for your pet's health as it is for yours. Tartar and plaque formation leads to gum disease, oral infection and, eventually, tooth abscess, which can cause your pet **unnecessary pain**. Even more dangerous, however, is the shedding of bacteria from the infected teeth into the blood stream. These bacteria can lead to kidney problems, as well as liver and heart disease, which is expensive to treat and may **shorten your pet's life**.

Laboratory tests before an anesthetic or surgery, can help make us aware of unknown medical conditions that may make your pet a poor surgical risk, or indicate an increased likelihood of an adverse reaction to the anesthetic agent. In addition, these tests can help us discover many problems early on, before they cause unnecessary pain, expense... or worse.
