

## STRATEGIC DEWORMING

Based on the latest recommendations from the Center for Disease Control (CDC)

### Reducing the risk to your children and you

Roundworm, Hookworms, Tapeworms (Heartworm)

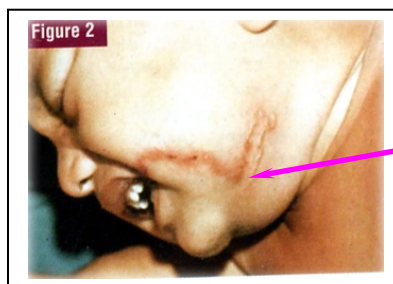

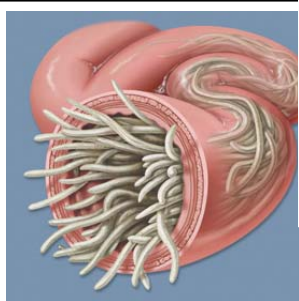

#### Your Pet

- Almost ALL puppies and kittens are born with parasites or acquire them during nursing.
- In newborn pets the damage can be severe, causing extreme illness.
- Tapeworms are carried by fleas - Keeping your pet flea free is essential!

#### Healthy Pet = Healthy People

- It is estimated that 10,000 kids in the US are infected by pet-born parasite every year. 750 kids will suffer parasite-related blindness, or even death.
- Up to 15% of children in the US are seropositive for Roundworms.

Zoonoses (transmitted from pet to human) are 100% preventable!

Parasite migration to the skin

#### Staying Healthy

1. Join our low cost "Wellness Plans"
  - Follow our strategic Deworming (year-round preventives).
  - Follow our Flea prevention program (Keep your pets flea-free).
  - Bring a fecal sample from your pet to be examined by our staff twice a year.
2. Practice good hygiene by washing your hands regularly.
3. Promptly remove pet droppings from your yard and sand box.
4. Keep pets clean and bathe your pet regularly.
5. Feed your pet only cooked food (commercial pet food) and Fresh Water
